			\$	\$	\$

Terms and Conditions:

- Purchased Dust Control requests and applications are subject to the provision of Wheatland County Policy 9.4.3 “Dust Control,” along with any additional terms and conditions provided within this order form.
- All requests for dust control product application are subject to final approval by Wheatland County prior to application of the product.
- The minimum consecutive length required for each location requested for the application of dust control product is 120 meters. The length of application will generally be centred on the residence, unless otherwise requested by the purchaser, subject to the final approval of the County.
- Wheatland County does not manage or maintain Local Provincial Highways. All applications of Purchased Dust Control on Local Provincial Highways are subject to approval by the Provincial Road Authority.
- Spray-applied calcium chloride dust control consists of a one-time, double spray application of the calcium chloride dust control product.
- Dust Control products applied to roads are intended to help suppress the formation of air-borne dust originating from the road surface, but they do not eliminate the formation of all air-borne dust. Wheatland County does not guarantee the dust-mitigating effectiveness of any dust control products or applications.
- If a road section, for which Spray-Applied Dust Control was previously applied, becomes rough, or wash boarding occurs, at any time after application, it will be graded along with the adjoining roadway without the reapplication of the dust control product, except that the Purchased Dust Control warranty provisions provided in the Dust Control Policy still apply within the specified warranty period.
- All spray-applied dust controls will be graded routinely with the adjoining roadway after November 1st of any given year.
- Wheatland County retains the right to perform work on the roadway in a location scheduled for dust control application either prior to or after such application, as required to maintain roadway safety, integrity, and drainage. If the work is completed outside the warranty period, Wheatland County is not obligated to re-apply the dust control product following the performance of work on the roadway.
- Dust Control warranty information is available within Wheatland County Policy 9.4.3, which can be accessed on the Wheatland County website (wheatlandcounty.ca)

I, the undersigned, understand and agree to the above terms and conditions.
